

HUMAN PLUS 2004

**First Conference of the Archipelago of Humanistic Thematic Networks
"The role of the humanistic arts and sciences in European society, education and research"**

Name: Wim Kratsborn

Work group: Learning/teaching strategies

Network: CiCe

1. What's the necessary 'body of knowledge' of the learner? Should we develop a European 'body of knowledge (as a teaching strategy)?
2. A balance and an integration between 'the knowledge based citizen' and 'the creative citizen' is essential. Aesthetics make sense.
3. A step-by-step-structure is a good route to a multiple intelligent European citizen. It's essential for the application of learning strategies in reality.
4. Social constructivism is the only learning strategy to deal with the problems of the world to-day.
5. What is or should be the influence of the enlargement of Europe in 2004 on learning strategies?
6. Is this the right time to integrate the work of different European networks about learning strategies? What's the main task?
7. 'The bigger the island of multiple intelligences, the longer the shore of lifelong learning'.
